

“Penguin are the best.
They just chilling there and here.
Except when orcas come.”

-Leong Kang Le

About Me

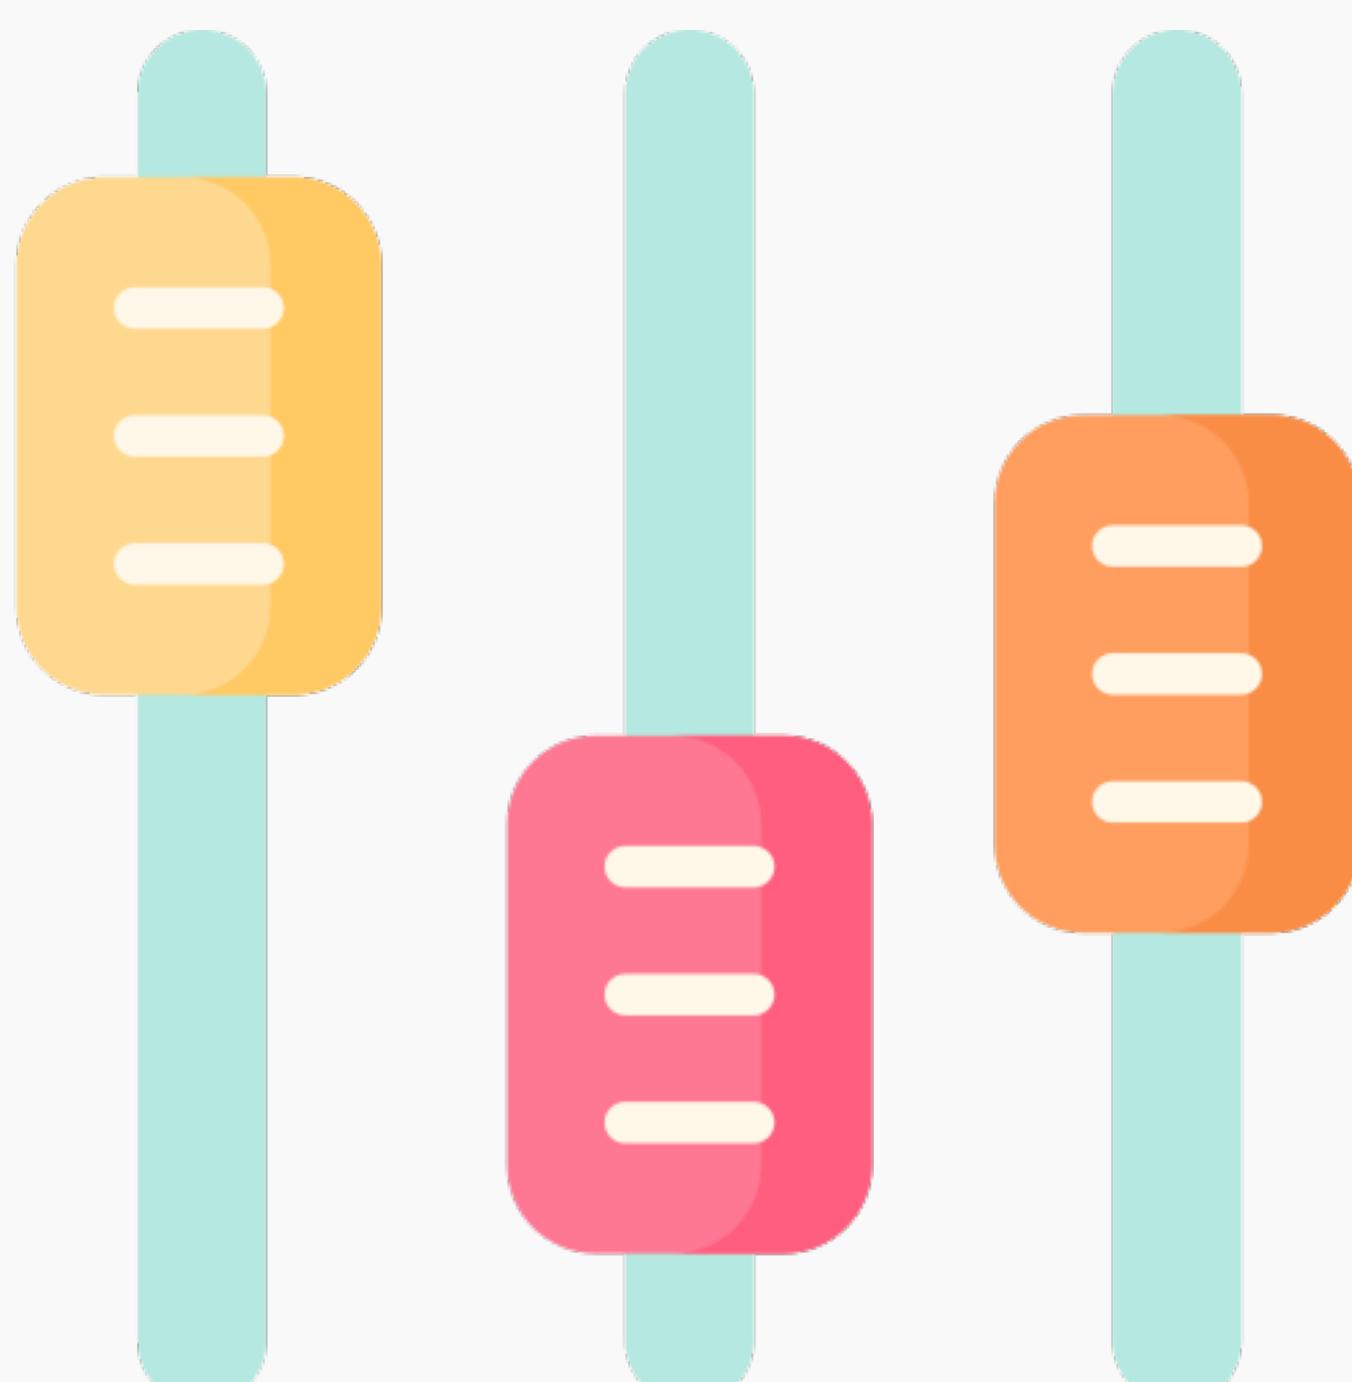

Childhood

Hello there, my names is Leong Kang le, I'm an amateur dame developer that want to develop game interesting to others and enjoy myself.

Since my childhood, I have a passion for games and obsess with the world inside the game. During my free time, my brother and I will talk about background story of the game. Most of the topic are about visual style of the game, game play work flow, and their real life counter part.

Adolescent

When I enter the middle school, I start researched on the background story of the game my own. And during the researched process, I had come across various well design game, Resident Evil develop and public Capcom are one of it .

From the early series that had limited game play with visual horror, to the fun-to-play jumpscare modern horror game, Resident Evil had proof to be a well design game from visual design, world building, and game experience.

Young Adult

In my young adult stage, I'm attempt my education in New Era University to get a Bachelor Degree in Software Engineering to learn and enhanced my skills as a game developer.
